Contents

PART ONE	GENERAL INTRODUCTION AND OUTLINE OF THE THESIS	11
Chapter 1	Introduction and manuscript content	13
Chapter 2	Case-study: Energetische verliezen uit de korte darm, meer dan vet alleen	19
Chapter 3	Diagnostic tests for malabsorption and maldigestion	29
PART TWO	CLASSICAL METHODOLOGY OF INTESTINAL FUNCTION IN HEALTH AND DISEASE	47
	<i>Healthy subjects</i>	
Chapter 4	Bomb calorimetry, the gold standard for assessment of intestinal absorption capacity: normative values in healthy ambulant adults	51
	<i>Intensive Care Unit</i>	
Chapter 5	Fecal energy losses in enterally fed intensive care patients: an explorative study using bomb calorimetry	69
Chapter 6	Malabsorption and nutritional balance in the ICU: fecal weight as a biomarker: a prospective observational pilot study	85
	<i>Celiac disease</i>	
Chapter 7	Vitamin and mineral deficiencies are highly prevalent in newly diagnosed celiac disease patients	105
Chapter 8	Refractory celiac disease and EATL patients show severe malnutrition and malabsorption at diagnosis	127

PART THREE ADVANCED ASSESSMENT OF INTESTINAL FUNCTION 147

Citrulline

Chapter 9	Poor diagnostic accuracy of a single fasting plasma citrulline concentration to assess intestinal energy absorption capacity	151
------------------	--	-----

Chapter 10	The citrulline generation test: proposal for a new enterocyte function test	167
-------------------	---	-----

PART FOUR GENERAL DISCUSSION 187

Chapter 11	General discussion and future perspectives	189
-------------------	--	-----

PART FIVE ANNEXES 209

Summary	210
Samenvatting	215
Dankwoord	221
List of publications	231
About the author	237
